OZONE WATER

✓ **REDUCES ENERGY COST** by eliminating the use of hot water

✓ **REDUCES CHEMICAL COST**

✓ Leaves **NO RESIDUAL** or harmful by-products

antimicrobial agent for use in the treatment, storage and processing of food.

Traditionally, most industries use a combination of chemical based detergents and/or chlorine, hot water and steam for disinfecting surfaces such as food processing equipment, utensils, kitchen appliances and floors. Ozone eliminates the use of hot water and reduces the use of chemicals. Therefore, ozone water helps to save energy and reduce water consumption. Ozone can kill bacteria 3,100 times faster than chlorine. Ozone is more effective than other disinfectants,

and is easy to remove from surfaces. Ozone is safe for use on food processing equipment and floors.

Dear Sir or Mdm,

Thank you for visiting A-Tech Engineering Company Limited website.

*To obtain full copy of this brochure, please complete the enquiry form at **CONTACT US** page and we will arrange to email you a copy of the brochure accordingly.*

Best regards

A-Tech Engineering Company Limited
